Claims 82-144 are presented for examination.

Applicants' amendment and response filed September 27, 2007 have been received and entered.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 82-144 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 19-77 of copending Application No. 10/759,160. Although the conflicting claims are not

identical, they are not patentably distinct from each other because of reasons set forth in the Office action dated July 20, 2007 at pages 2-3 is **MAINTAINED**.

The rejection made under obviousness-type double patenting is adhered to.

Claims 82-144 are not allowed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 82-101 and 103-125 are rejected under 35 U.S.C. 103(a) as being unpatentable over Riedel et al. (6,558,680 B1) in view of Chapin et al. (4,370,319), all of record, for reasons of record as set forth in the previous Office action dated July

20, 2007 at pages 4-6 as applied to claims 19, 21-27, 35-38, 40, 42, 44-47, 49, 51, 53, 55, 57, 59-62, 66, 67, 70, 72, 74, 76, 78 and 80.

Applicants' remarks regarding the prior art, Riedel et al., composition does not recite the term "pearlescent" are not persuasive since the recitation of intended use does not further limit a claim drawn to a composition.

Applicants' remarks regarding the prior art, Riedel et al., composition does not recite the term "substantially free of mono- and di-fatty acid esters of glycerol and glycol" are not persuasive since the independent claim 82 does not recite the "critical limitation".

Applicants' remarks regarding the prior art, Riedel et al., composition does not recite the use of applicants' preferred polymers, an amphiphilic polymer, an associative polymer and a siloxane elastomer are not persuasive since the prior art does teaches the use of polymers (broadly) in the instant composition. Clearly, one skilled in the art would have assumed the substitution of one known element (a polymer) for another would have yielded predictable results at the time of the invention.

The rejection made under 35 USC 103 is adhered to.

Claims 82-101 and 103-125 are not allowed.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
